

# USER GUIDE

---

This guide takes you through the steps to use the software.

1. Make sure you have updated your Facebook user id and password in the file `chatbot.py`
2. Optional step – Upload the 2 files **`cleverbot.py`** and **`chatbot.py`** to Heroku, so that the chat bot can keep running on the cloud.
3. Run **`chatbot.py`**
4. Wait for your friend to message you, and the bot to follow up 😊
